

Nursing Products & Routine Consumables Cost Management Team

The Nursing Products & Routine Consumables Cost Management Team meets every other month and its functional scope is as follows:

- Assess and approve the evaluation and/or acquisition of new nursing products/devices & routine consumables, equipment with disposables and related new technology for use at UTMB with a threshold of up to \$25,000 additional annual spend.
- Decisions are based upon review of financial data, published clinical studies and available clinical evidence
- Coordinates new product/ device/equipment introductions and evaluations
- Reviews GPO opportunities, along with other opportunities to standardize related products, devices and equipment.
- Educates others on the UTMB Value Analysis Process
