

Supply Management Team

The Supply Management Team is unique in the Value Analysis Program at UTMB. Team membership is comprised of the Cost Management Team Facilitators along with representatives from Clinical Purchasing, Data & Analytics, Value Analysis and other supply chain personnel.

This team meets twice monthly and reviews all new Value Analysis requests to assure the packet contains required information prior to sending it to the appropriate Cost Management Team for approval.

The Supply Management Teams also reviews UTMB purchasing data, GPO contracts and other information to identify standardization and savings opportunities, which are then forwarded to the appropriate Cost Management Team to provide assistance in meeting the committee goals.
