

University of Texas Medical Branch at Galveston
Research Histopathology Core
Charges effective 2010-2011

PROCESSING:

- \$3.00** Routine processing and embedding of tissue received in cassette, per cassette
- \$4.50** Routine processing and embedding of tissue not received in cassette, per cassette
- \$4.00** Special embedding, or re-embedding, per paraffin block
- \$4.00** Decalcification of bone specimens, per specimen
- \$3.50** Frozen embedding, per mold
- \$8.00** Cytospin cell preparation, per slide

MICROTOMY:

- \$2.65** Paraffin sections, per block, 1-2 sections per slide, 1st slide
- \$1.50** Additional sections from the same block, 1-2 sections per slide
- \$1.25** Special level paraffin sections from same block on one slide, per section
- \$1.50** Multiple sections from different paraffin blocks on one slide, per section
- \$10.00** Preparation of Dnase & Rnase free paraffin section, per application
- \$5.00** Preparation of Dnase & Rnase free frozen section, per application
- \$3.50** Frozen sections, per specimen, 1st slide, 1-2 sections/specimen
- \$2.50** Additional frozen sections from the same specimen, 1-2 sections per slide
- \$1.50** Special level frozen sections, per section
- \$10.00** Decontamination charges for frozen sections on BSL2

STAINING: Does not include microtomy charge

- \$2.50** H&E, per slide

Special Stains are not limited to the ones listed. Most can be performed if reagents and protocols are available. They will be charged according to cost of supplies and time required to perform them.

\$5.00 Group I Stains, per slide:

Acid Fast (AFB)	Mucicarmine
Giemsa	Oil Red O
Gram	Periodic Acid-Schiff's (PAS)
Hematoxylin-Phloxine-Saffron (HPS)	Verhoeff-Van Gieson (VVG)
Iron (Prussian Blue)	Bile

\$7.50 Group II Stains, per slide:

Congo Red	Movat
Luxol Fast Blue (LFB)	Trichrome
Phosphotungstic Acid Hematoxylin (PTAH)	

\$12.00 Group III (Silver) Stains, per slide:

Central Nervous System stains	Reticulin
Fontana-Masson	Steiner
Gomori's Methenamine Silver (GMS)	VonKossa
Jones' Periodic Acid Methenamine (PAM)	

IMMUNOHISTOCHEMISTRY: Charge does not include processing or microtomy. Primary antibody and manufacturer's data sheet must accompany the request for service.

- \$12.00** IHC, antibody provided by investigator, per slide
 - \$15.00** IHC, manual, per slide
 - \$22.00** Tunel, kit provided by investigator, per slide
 - \$1.00** IHC counterstaining and coverslipping, per slide
 - \$20.00 (Other Service)** Deparaffinization, up to 20 slides
 - \$30.00** Pre-IHC treatment: includes deparaffinization, peroxidase blocking, HIER antigen, up to 20 slides
 - \$150.00** Work-Up: includes deparaffinization, peroxidase blocking, HIER antigen, counterstaining, and coverslipping
 - \$35.00** In Situ Hybridization, per slide
- *If special kits are required, charges will be adjusted accordingly.

INSTRUMENTATION USAGE:

- \$10.00** Instrument usage, per hour, or part thereof. Includes microtome, cryostat, digital camera and/or fluorescence microscope, tissue microarrayer

New services not listed will be charged accordingly or otherwise specified later.
