Supporting the learning and research needs of students and faculty of UT System and UT TeleCampus on campus and at a distance.

The UT System Digital Library (UTSDL) complements the strengths of our traditional collections, expands existing services and programs, and at the same time creates entirely new options for access to scholarly information for the UT System community, including distance learners. The UTSDL works collaboratively with all UT System component libraries, the UT System Office of Telecommunications Services, the UT TeleCampus, the UTSDL Council of Directors and related organizations to carry out these activities.

Program management by UT-Austin General Libraries
UTSDL Director: Sue Phillips
UTSDL Technical Director: Mark McFarland
