

Pancreatico-Biliary Surgery Center

Services

Dr. William H. Nealon has developed two decades of experience in the complex diseases of the pancreas, bile ducts, and liver. He has published extensively on the clinical management of these patients, and for years he has established a network of referrals from throughout the state of Texas and beyond. He combines vast experience in the surgical management of these diseases with skills in interventional ERCP. He directs the multi-disciplinary clinic comprised of gastroenterologists, with skills in advanced endoscopic procedures and endoscopic ultrasound (EUS), and interventional radiologists.

Dr. Nealon and Dr. Courtney M. Townsend, Jr., the Chairman of Surgery, successfully recruited Dr. Taylor S. Riall, an experienced pancreatico-biliary surgeon from Johns Hopkins University, a center globally recognized for its expertise in the management of pancreaticobiliary disease.

She has extensive experience in the treatment of patients with pancreatic cancer and other pancreaticobiliary diseases and has written multiple papers helping to define the management of patients with pancreatic and other periampullary cancers.

The focus of the Pancreatico-Biliary Surgery Center is the treatment of all malignant and pre-malignant lesions of the pancreas, bile ducts, and liver as well as all complex benign lesions such as severe necrotizing pancreatitis, pancreatic pseudocysts and benign bile duct structures and benign lesions of the liver.

The following is a list of services provided:

Pancreatic diseases

- Carcinoma of the pancreas
- Intraductal papillary mucinous neoplasms (IPMN)
- Cystic lesions of the pancreas
- Neuroendocrine tumors of the pancreas
- Metastatic lesions to the pancreas
- Familial pancreatic cancer
- Necrotizing pancreatitis
- Pancreatic pseudocyst
- Pancreatic fistula
- Pancreatic ascites
- Pancreas divisum
- Chronic pancreatitis
- Familial pancreatitis

Bile duct diseases

- Choledocholithiasis
- Benign bile duct stricture
- Bile duct injuries
- Merrizzi's Syndrome
- Choledochal cyst
- Carcinoma of the bile duct (cholangiocarcinoma)
- Ampullary stenosis
- Ampullary cancer
- Adenocarcinoma of the duodenum

Hepatic diseases

- Hepatocellular carcinoma
- Hepatic metastases
- Hepatic cysts
- Hepatic abscess
- Focal nodular hyperplasia
- Hepatic adenoma
- Giant hemangioma

Surgeons

William H. Nealon, M.D.
Professor of Surgery

Taylor Sohn Riall, M.D.
Assistant Professor of Surgery

Orhan Seref Ozkan, M.D.
Assistant Professor
Interventional Radiology

Gottumukkala S. Raju, M.D.

Professor of Medicine

Gastroenterology
