Fluid Balance Monitoring System with Fluid Infusion Pump for Medical Treatment

Inventors: George C. Kramer; Guy A. Drew; Donald J. Deyo; Allen E. Brandenburg; Richard B Voigt

Description:
Novel fluid delivery systems are disclosed to improve the delivery of bio-compatible fluids to a patient. The systems can include a housing having a bladder pressurized by a pressurization unit so that fluid flow rate can be controlled, changed and/or monitored. The systems can also include a scale and/or a flow control unit.
