**Upregulation of Opioid Receptors for Pain Management**

**Inventors:** Li-Yen Mae Huang; Yanping Gu

**Description:**
Disclosed are methods for treating pain in a subject. The method includes upregulating expression of opioid receptors in the subject's dorsal root ganglion or trigeminal neurons. Also disclosed are methods of treating neuropathic and/or chronic pain in a subject. The method includes upregulating expression of 
\( \mu \)-opioid or \( \delta \)-opioid receptors in the subject's dorsal root ganglion or trigeminal neurons.

**Patent Status:** Patent Pending [USPN 12/924,738](https://www.google.com)
