Treatment for Neuropathic Pain Due to Spinal Cord Injury

**Inventor:** Regino Perez-Polo

**Description:**
The present invention is drawn to treatment of neuropathic pain due to spinal cord injury. Such a method comprises the step of administering pharmacologically effective amounts of a IL-1 receptor antagonist (IL-1ra) to the individual, thereby treating the neuropathic pain in the individual.

**Patent Status:** Patent Pending [USSN 12/079,956](https://www.google.com)
