Fusogenic Virus-like Particles and Uses Thereof

Inventor: Pramila Walpita

Description:
Provided herein are novel Paramyxovirus virus-like particles, wherein said virus-like particles are composed of surface glycoprotein G; surface glycoprotein F; and matrix protein M. Further provided is a vaccine comprising the virus-like particles described herein and a pharmaceutically acceptable carrier. Also provided is a method of vaccinating a subject against paramyxovirus infection comprising administering the vaccine described herein.

Patent Status: Patent Pending USSN 13/134,266
