

**APPENDIX A  
HIGH RISK HAZARDOUS CHEMICALS**

The following chemicals are currently classified as High Risk Hazardous Chemicals. **Approval from the UTMB Chemical Safety Committee is required prior to purchase or use of any High Risk Hazardous Chemicals.**

Abrin*	Phalloidin
Aconitine (amorphous/crystalline)	Ricin*
Aflatoxins	Sarin
Amanitin	Saxitoxin*
Batrachotoxin	Shiga-like ribosome inactivating proteins*
Bis (chloromethyl) ether, syn. Dichloromethyl ether	Shigatoxin*
Botulinum neurotoxin*	Soman*
Chloromethyl ether, methyl	Staphylococcal enterotoxins*
Clostridium perfringens epsilon toxin	Tabun
Conotoxins*	Taipoxin
Ciguatoxin	Tetrachlorodibenzodioxin
Diacetoxyscirpenol*	Tetanus toxin
Diisopropyl fluorophosphate	Tetrodotoxin*
Diphtheria toxin	Textilotoxin
Maitotoxin	VX
Microcystin	T-2 Toxin*

\*Select Agent – NOTE: In addition to the HRHCSP, these agents also require approval by the CDC/APHIS Select Agent Program prior to commencement of work.
