Respirator Training and Fit-Testing

Anyone that wears a respirator must be medically evaluated through Employee Health (x-79172). After medical approval, then contact EHS (x-21781) to schedule respirator (N95 – PAPR) training and fit-testing. A fit-test is required for every model of tight-fitting respirator worn. The medical evaluation and fit-test must be repeated annually. Contact EHS at x-21781 for further information.
