Normal tympanic membrane
Small exostosis
Large exostoses
Osteoma
Otitis externa
Chronic otitis media with associated otomycosis
Otomycosis with aspergillus
Squamous cell carcinoma of the external auditory canal
Otitis externa
Canal cholesteatoma following debridement
Hemangioma of the external auditory canal
Lead tattoo many years following being stabbed in the ear with a pencil.
Status post a temporal bone fracture with fracture of the scutum
Temporal bone fracture with dislocation of the incus which is partially protruding through the tympanic membrane.
Traumatic tympanic membrane perforation
Healing traumatic tympanic membrane perforation
Acute otitis media
Acute otitis media
Otitis media with effusion
Chronic otitis media with effusion
Status post myringotomy and PET insertion
Status post myringotomy and T-tube insertion
Incudomycingopexy
Incudomyringopexy with early erosion of the incudostapedial joint
Severe tympanic membrane atelectasis
Pars tensa retraction pocket cholesteatoma
Small attic retraction pocket cholesteatoma
Large attic retraction pocket cholesteatoma
Aural polyp
Aural polyp
Tympanic membrane perforation
Tympanic membrane perforation
Large subtotal tympanic membrane perforation
Large total tympanic membrane perforation
Chronic otitis media with purulent discharge
Monomeric membrane
Monomeric membrane with powder applied using Photoshop
Bullous myringitis
Tympanosclerosis
Glomus tympanicum
Glomus jugulare with middle ear extension
Jugular bulb
