CALL FOR PILOT PROJECT PROPOSALS

DEADLINE: Friday, February 13, 2015

The UTMB Claude D. Pepper Older Americans Independence Center encourages UTMB investigators to submit pilot research proposals in the area of aging, physical function and recovery from illness in older adults. Proposals from any domain of translational research (T1-T4) are welcome, including but not limited to basic research, clinical trials, and patient-centered outcomes research. Projects will be funded for one or two years, with total annual direct costs not to exceed $30,000.

The purpose of this pilot funding is to support aging-related research that will realistically lead to external funding. Pilot awardees will have access to clinical research resources, such as a research coordinator, provided by the Pepper Center.

Proposals are encouraged from all investigators interested in initiating studies on aging.

The pilot proposal selection will follow a 2-step process:

**Step 1: Letter of Intent** - Interested investigators should write a brief letter of intent describing in one page or less their research idea and how this idea would lead to external funding in the area of aging. Letters can be submitted to Stephanie Burt (Pepper OAIC Administrator) at Route 0177 or via e-mail to stburt@utmb.edu. Deadline for receipt of the letter of intent is February 13, 2015.

*Letters of intent* will be evaluated by the Pepper Executive Committee, and those selected will be asked to submit a full proposal.

**Step 2: Full Proposal** — If selected to submit a full proposal, a 5-page proposal in NIH format will be required outlining your research plan. If requested, a research mentor can be assigned to assist with development of the proposal.* Deadline for receipt of the full proposal is Friday, March 27, 2015.

Full proposals will be evaluated by the Pilot Selection Committee, comprising of members of the ITS Scientific Review Committee, Pepper Center leaders and an independent external reviewer with specific expertise in the area of the pilot application.

Please feel free to share this announcement with your colleagues.
