Accountability and Responsibility for State Property

Policy

The University of Texas Medical Branch ("UTMB") must protect the property within its care. UTMB employees who fail to safeguard UTMB property in accordance with UTMB policy are subject to disciplinary action, including termination.

The property manager for UTMB is the Vice President of Financial Accounting and Reporting or their designee. The UTMB property manager is responsible for maintaining inventory records.

Department chairs, department heads, or administrative equivalents are responsible for all UTMB property in their care and for performing the annual physical inventory for capital and controlled assets at the time and in the manner prescribed by Asset Management. They may designate an Asset Manager(s) and an Asset Custodian(s) to complete administrative tasks associated with the annual inventory process.

UTMB’s general revenue funds, General Revenue-Designated, or other funds appropriated will be reduced if an unacceptable percentage of capital and controlled assets are reported missing at the conclusion of the annual inventory process.

For questions concerning this policy, contact.
