The NIA Butler-Williams Scholars Program (formerly Summer Institute on Aging Research) is accepting applications for an intensive introduction to aging research. This program for investigators that are new to aging research is focused on the breadth of research supported by the National Institute on Aging, including basic biology, neuroscience, behavioral and social research, geriatrics and clinical gerontology. As an offering through the NIA Office of Special Populations, program content will include a focus on health disparities, research methodologies, and funding opportunities. The Butler-Williams Scholars Program (B-W Scholars) is one of the premier, short-term training opportunities for new investigators. New researchers are defined as those who have recently received the M.D., Ph.D. or other doctoral level degree. The B-W Scholars Program provides unparalleled access to NIA and NIH staff in an informal setting.

The 2016 B-W Scholars Program will be held July 25-29 in Bethesda, Maryland. Support in most cases is available for travel and living expenses.

Applications are due March 25, 2016.

Researchers with an interest in health disparities research are encouraged to apply. Applicants from diverse backgrounds, including individuals from underrepresented racial and ethnic groups, individuals with disabilities and women are always encouraged to apply for NIH support. Applicants must be U.S. citizens, non-citizen nationals, or permanent residents.

Please view more information on the NIA web site: https://www.nia.nih.gov/about/events/2015/butler-williams-scholars-program-2016

Please feel free to circulate the above message to potential applicants.
