The University of Texas Medical Branch at Galveston recognizes Fisher Scientific-Possible Missions as the preferred vendor for scientific lab supplies, and has chosen Fisher Scientific-Possible Missions for on-site vending, based on their discounted pricing and innovative products and systems.

On September 13, 2011, Fisher Scientific and HUB subcontractor, Possible Missions, re-opened the Scientific Alley Storeroom. The involvement of Possible Missions helps UTMB meet HUB and Federal Small Business reporting requirements.

The partnership between UTMB and Fisher Scientific-Possible Mission offers many advantages, and we are very excited to announce the following benefits:

- A dedicated sales representative to assist with product selection, information, demonstrations and troubleshooting.
- An onsite specialist to assist with sourcing products and recommendations for lower cost alternatives, product delivery and chemical receiving.
- A broad portfolio of more than 800,000 products available, from hundreds of leading suppliers.
- Approximately 440 items, including chemicals, stocked at Scientific Alley.
- Aggressive discounts on many items.
- Next business-day delivery on most non-stock items.
- No hassle return policy.
- New Laboratory Start-up special offers and product promotions.
- Product shows and technical seminars to keep researchers informed of new products and technologies.
- No minimum order.
- Technical support available in the areas of chemical, safety and hazardous materials.
- No normal transportation fees (including hazardous fees, etc.) on non-stock items.
- Meets HUB and Federal Small Business requirements for grant purposes.
